\$129.99 sale price

No Springs Attached!

Utilizing an exclusive polymer torsion system, instead of a spring, PolyForce™ Belt Tensioners by Kit Masters are built to last.

Improved Bearings

One of the common failure point in a belt tensioner is the bearing. The pulley bearing absorbs a huge amount of vibration and can often fail too soon. PolyForce™ Belt Tensioners have dramatically improved pulley bearings to give them extended life. Our bearing is designed specifically for pulley applications and features:

- Outer Ring Rotation
- Anti-Vibration Grease (won't separate)

**Offers valid until 12/31/26*
