

★ DPF CLEANING INDUSTRY LEADING DPF CLEANING TECHNOLOGY

Dust & Ash Collector

Pneumatic Cleaner

- 94% Ash Removal -
20% More than the competition
- Longer Intervals Between Cleanings
- Identify Potential Filter Deficiencies
- Increase DPF Service Life
- Thermal Regeneration Service Available

FSX TrapBlaster 7

FSX TrapBlaster 7 Pneumatic Cleaner with patent-pending technology utilizes two air knives to remove 94% of the ash from your DPF. Compared to pulse air cleaners only removing 74% of the clogging material in your DPF, you get longer intervals between cleanings with the FSX TrapBlaster at Peterson Trucks.

PULSE CLEANING Technology

Attempts to clean 5000 cells at once.
Center cells clean first, while outside
cells get little cleaning. Stops cleaning
when a path of least resistance
is established.

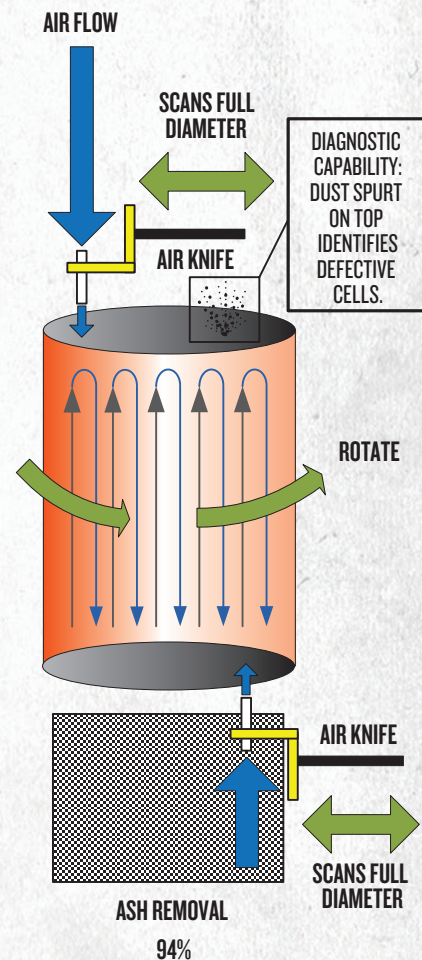

Process time: 20 minutes
Cleaning action is hidden on both ends.
Operator cannot tell when cleaning
is complete.

FSX TRAPBLASTER

Cleans using air knife scanning on
both ends of the filter. Each individual
cell is scanned hundreds of times
from both directions.

Process time: 22 minutes
Cleaning action 100% visible to
operator. Cleaning complete when
dust stops exiting filter.
