Fluid Analysis is accomplished in three easy steps

1

Pull
oil samples

2

Ship
samples to
the oil lab

3

Action Plans
are created
from results

START TODAY AND SAVE MONEY MANAGING YOUR TRUCK

- ▶ **REDUCE REPAIR COSTS**
Detect potential problems early by taking oil samples at consistent intervals.
- ▶ **REDUCE THE IMPACT OF DOWN TIME**
Use the results from your oil analysis to schedule repairs before they become possible failures on the road.
- ▶ **REDUCE UNCERTAINTY**
Know your truck inside and out with four different types of testing we offer; Wear Rate, Oil Condition, Oil Cleanliness, and Oil Contamination Testing.

Peterson's oil analysis services are your management tools to maximize the life and productivity of your truck, and to minimize operating costs and down time.

Call today to see what oil analysis can teach you about your fleet.
